

## Anti-Stat Conductive Polyester/Nylon

Our 97% Conductive Polyester and 3% Nylon knitted no-run Material is specially designed to disperse static. Polyester wipes have a tendency to generate static during wiper applications. Our wiper dissipates the static. This is very helpful in electronic and static sensitive applications.

### TECHNICAL INFORMATION

Fiber	100% Textured Polyester with conductive grid
Sorbency	
Extrinsic (m/m)	425
Intrinsic (ml/g)	1.65
Rate (seconds)	1-2
Abrasion Resistance (%loss)	0.1
Tear Resistance (kg)	
Wrap	13
Fill	4.3
Extractibles (g/m)	
Deionized Water	0.044
1,1,1-trichloroethane	0.271
Ions (ppm)	
Sodium	7
Chloride	4
Total Inorganic Matter (ppm)	3910
Particles $\geq 0.5 \mu\text{m}$ (millions)	12
