Basic Series 100 Workstation

The workhorse of our product line, the **Series 100**, is strong, steady and versatile. Our standard **Series 100** is constructed of 16 gauge steel and features a full perimeter frame to insure complete work surface support. The work surface itself is constructed from industrial grade particle board and is fully sealed to minimize distortion. Laminate colors are available in both a standard and ESD grade. This fully welded system is engineered with integrated leg support cross members to maximize strength and rigidity under load. The leg section is simple yet functional and includes micro adjusting levelers to provide full adjustability of work height on uneven floors.

30" Deep Non-ESD			36" Deep Non-ESD		
Part No.	Description	Lbs.	Part No.	Description	Lbs.
1000	30" DP x 48" W x ___H	100	1020	36" DP x 48" W x ___H	120
