UltraFlex

The features you want.
The options you deserve.

Double bucket

Ergonomic extended legs

Multiple scaling units

UltraSpeed wringer (for UltraFlex buckets)

Colour coding system

Locking mechanism

UltraFlex...

As good as wet mopping gets!

If you are looking for the most up-to-date, innovative and ergonomic bucket-and-wringer system on the market – look no further.

It's here and it's the UltraFlex system from Vileda Professional – Marino. Engineered from the ground up, UltraFlex has been designed to perform the most hygienic cleaning of floors available today!

Steps to proper floor cleaning

1. After cleaning a portion of the floor, you now rinse your soiled mop in the dirty water compartment. This is done to remove any excess dirt from the mop before it enters the clean water compartment.

2. It is recommended that you wring the mop at this stage before the mop enters the clean water.

3. Once the mop has been submerged into the clean water, you will now wring out the mop to the desired moisture level. Continue to clean your floor, repeating steps one and two.

Top in class ergonomics

Having healthy personnel pays off in the long run, and one way of reducing wear and tear and body stress is providing cleaning tools with top class ergonomics.

UltraFlex has several features that all lead in the direction of offering your cleaning staff tools that are easy-to-handle, easy-to-use and with a minimum of uncomfortable movements.

- Extended leg design prevents excessive bending minimizing back strain
- Downpress wringer reduces the wringing force needed
- Bails and support grips for easy handling
- Adjustable telescopic handle (optional)
- Lightweight and easy-to-handle buckets

Top class economy

From the beginning of the UltraFlex development, one clear goal was to offer users unbeatable cleaning economy.

The ergonomic properties are, of course, an important parameter, where a healthy cleaning staff clearly contributes to your bottom line.

More obvious and with a faster pay-back is the effective down press, which reduces water release to the floor and thereby gets your floors ready for traffic in no time.

In addition, the clean water bucket configuration reduces water consumption and increases the cleaning area.

And above all – when working with UltraFlex you can feel and sense the overall high quality in every component, the basis for a long and trouble-free service life.

UltraFlex grows with your needs

Flexibility is UltraFlex's most obvious feature. The configurations are many, and the beauty lies in that you can easily change or upgrade your UltraFlex to new levels, as your needs and demands change. Design your optimal solution, and when times are changing – simply re-configure your UltraFlex. A walk in the park!

UltraFlex Downpress/Sidepress Complete

UltraFlex Basic features a large 34 litre/36 quart bucket and is the ideal configuration when the need is just an effective, regular mopping system with strength and durability at the forefront of the design.

In this configuration, UltraFlex can be put on the Vileda Professional – Marino Origo trolleys as well as most janitorial carts.

- German Engineered / Stylish Design
- Easy glide stainless steel castors
- Colour coding to reduce cross contamination
- Conforms with foodservice standards

UltraFlex Bucket with Castors

UltraFlex Basic features a large 34 litre/36 quart bucket and is the ideal configuration when the need is just an effective, regular mopping system with strength and durability at the forefront of the design.

- German Engineered / Stylish Design
- Easy glide stainless steel castors
- Colour coding to reduce cross contamination

UltraFlex Extended Leg Combos

UltraFlex Ergonomic Single Bucket System offers the added benefit of extended leg design which helps prevent excessive back bending.

The large 34 litre/36 quart bucket is the ideal configuration when the need is just an effective, mopping system with strength, durability and ergonomics at the forefront of the design.

The ergonomic leg option is sure to keep your staff healthy with minimal back strain

- German Engineered / Stylish Design
- Easy glide stainless steel castors
- Colour coding to reduce cross contamination
- Conforms with foodservice standards

UltraFlex Bucket-In-Bucket System

- Integrated, second clean water compartment to prevent cross contamination.
- Easily identify clean water from dirty water and to prevent cross contamination.
- The clean water bucket locks into place when in use and is easily removable for emptying and filling.
- UltraFlex can be put on the Vileda Professional - Marino Origo trolleys and most janitorial carts.
- Can also be used for waxing applications
- Conforms with foodservice standards

UltraSpeed wringer (for UltraFlex buckets)

- Easier for you or your customer to convert from traditional style mopping to flat mopping
- More ergonomic for users
- Less water/chemical consumption = saving money and the environment
- UltraSpeed mops last for 500 washes, top quality traditional style mop last for max 60 washes
- Offers more space to pre rinse the mop (Keeps clean water for longer period of time)
- Less time spent refilling bucket/s with water
- More cleaning coverage than traditional wet mops
- Different mops for different applications
- **Damp • Wet • Specialty**

Downpress Wringer

The Downpress wringer is injection molded with high density polymer and features a strong durable smooth surface that is easy to clean and sanitize.

- Unlike foam plastic wringers, our wringer does not provide a breeding ground for bacteria.
- Gears and pressure plates are fiber reinforced nylon which allows for quiet and smooth operation.
- Eliminate the need to stock various sized wringers. The wringer is designed to effectively wring all wet mops from 340 g to 900 g / 12 oz to 32 oz.
- The downward pressure style is especially designed to "better" wring all mop heads and engineered to force water directly into the bucket.
- Conforms with foodservice standards

UltraFlex Ergonomic Extended Legs

The addition of the UltraFlex extended leg design offers the added benefit which helps prevent excessive back bending.

- Provides a strong ergonomic benefit for users
- Increased maneuverability
- Conforms with foodservice standards

Vileda Professional – a part of the Freudenberg Group

Vileda Professional provides innovative cleaning solutions and systems for professional users in various application areas, such as General Building, Healthcare, HoReCa and Controlled Environment. With sales offices in all major European countries, in North America and Asia – and with a wide net of representatives – we are well located around the world. Vileda Professional belongs to the Freudenberg Group – a diversified family-run global company, headquartered in Germany.
