The AC Absolute Console series is a horizontal laminar flow bench designed and engineered to provide years of flawless operation with minimal cost and maintenance. The AC horizontal laminar flow console supplies Class 100 (ISO 5) or Class 10 (ISO 4) airflow across the work surface. It provides, protects and maintains the critical "Clean Zone" environment necessary for today's pharmaceutical and electronics Industries. Every Atmos- Tech AC console unit must pass a detailed and documented functional and quality examination prior to shipment to the customer. These include airflow tests and HEPA filter integrity testing. Construction materials include stainless steel, epoxy painted steel, laminated particle board and poly-pro. Custom sizes and configurations available.

**Specifications**

Nominal Work Area Unit Height B	30 in
Nominal Work Area Unit Height D	67 3/4 in
Power	115V Single Phase
Options	<ul style="list-style-type: none"> Casters Front or Rear Filter Change Gel Seal Filters IV Bars Reverse Air-Flow Static Elimination Systems UV Lighting Various Voltages
Nominal Work Area Unit Width A	48 in
Nominal Work Area Unit Depth C	22 in
