GTC-540 - Clean Solution

The GTC-540 is an essential companion to your Firetube Boiler Cleaner. Considering the costly effects of soot buildup, it pays to maintain your firetube boilers with this complete soot removal system. The high CFM rating of the GTC-540 vacuum ensures speedy and tidy elimination of performance-robbing substances, with none of the filter clogging you'd expect from light, powdery materials like firetube soot.
