

# FoamZorb™ Foam Wipes

Clean processed open-cell hydrophilic foam wipes

## Description

FoamZorb foam wipes are engineered for use in cleanroom and other critical applications. The open cell structure is very strong, even when wet. The wipes combine high absorbency with low levels of extractable residue and particles. FoamZorb wipes are very easy to wipe with, without grabbing or sticking to surfaces like some sorbent foam wipes can. Excellent for spill pick-up, solvent and solution application, and is ideally suited for lithographic screen cleaning.
